

## Polyether Amine CAM-2005

### COMPOSITION:

CAM-2005 is a kind of mono-functional primary amine, with the advantage of improving the softness of polymers.

### TECHNICAL DATA:

CAS	83713-01-3
Appearance	Colorless to pale yellow transparent liquid
Molecular weight Wn	2000
Color (Pt-Co)	75 Max
Amine Value mmol/g	0.44-0.52
Water content %	0.30 Max

### APPLICATIONS:

- Control the molecular weight of polyamide
- Preparation of comb polymers (acrylic acid) or similar linear polymers

### PACKAGE:

200kg/barrel with nitrogen
