

TECHNICAL DATA SHEET

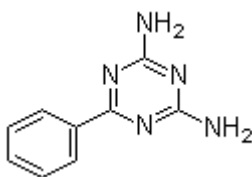

NAME OF COMMODITY: Benzoguanamine

CAS NO.: 91-76-9

MOLECULAR FORMULA: C₉H₉N₅

MOLECULAR WEIGHT: 187.2

STRUCTURE FORMULA:

TESTS	SPECIFICATIONS
Appearance	White Crystalline Powder Free From Obvious Impurities
Ash %	0.05% Max
Water %	0.1% Max
Free Alkali %	0.05% Max
Melting Point (°C)	224-248

APPLICATIONS:

Benzoguanamine is a common and special chemical intermediate. It is used as thermosetting resins, modified resins, paints, plastics, pharmaceuticals, pesticides and dyes.

It is also used in industries of oil fields, paper production, textiles, dyes, petroleum chemistries, metallurgies and construction materials, etc.

PACKING: net 25kg bags; 16mt/20'fcl palletized
